There are ways to lower your costs when your doctor orders an outpatient MRI, CAT scan, PET scan, etc. Your out-of-pocket cost depends on where you have the test done. This information applies to in-network providers only.

1. **Hospital or Hospital Associated Facilities**: Covered imaging services at the hospital or facilities associated with a hospital are usually significantly more expensive than at independent facilities, and on Options 2 and 3, you pay a greater portion of the charge than you would at an independent facility:

   **Option 2**: $125 copay + $1,500 deductible + 20% of remaining charges
   **Option 3**: $125 copay + $500 deductible + 20% of remaining charges

2. **Independent Facilities**: Below is a list of locations where covered imaging services are paid 100% after you pay a $100 copay on Options 2 and 3. This list does not include all facilities that charge these rates. Any facility that is “in-network with BlueCross Network S” (out-of-network facilities may say they “accept” your insurance, but this is not the same as being in-network) and “bills as an independent imaging center” (not as a hospital or hospital affiliated facility) should also bill at the reduced rate. Call the facility to ask if they offer the type of imaging your doctor has ordered.
