Mosquitoes in north Knoxville test positive for West Nile virus

Knoxville, Tenn. – The latest lab report has confirmed the presence of West Nile virus (WNV) in *Culex* mosquitoes in the Fairmont Boulevard area of north Knoxville. Following Centers for Disease Control and Prevention (CDC) protocol, the Knox County Health Department (KCHD) will spray for mosquitoes in this area on **Thursday, Oct. 3 between 8:30 p.m. and 2 a.m.**, weather permitting, to reduce the *Culex* mosquito population and the risk of WNV spreading to humans. Signs will be posted in the affected neighborhoods to alert residents, who are asked to stay inside during spraying and keep pets inside or in the backyard.

To reduce the risk of contracting WNV and other mosquito-borne diseases, KCHD recommends:

- Applying repellants to skin often when outdoors; repellants can be lotions, liquids or sprays. The CDC recommends the use of Environmental Protection Agency (EPA)-registered repellants containing one of the following ingredients: DEET, picaridin, oil of lemon eucalyptus, para-menthane-diol, 2-undecanone or IR3535. The duration of protection varies by repellant. Read labels on products to determine when reapplications are necessary for optimal protection.
- Wearing socks and long, loose, and light-colored shirts and pants.
- Treating clothing with permethrin or purchasing pretreated permethrin clothing.
- Disposing of, regularly emptying, or turning over any water-holding containers on your property such as tires, cans, flower pots, children's toys and trash cans to reduce mosquito habitats.
- Using larvicides, such as mosquito torpedoes or mosquito dunks, to prevent mosquito proliferation in large water-holding containers, including bird baths and garden water features. If used properly, larvicides will not harm animals.

Fairmont Boulevard spray area:

Mineral Springs Avenue from Walker Boulevard to Whittle Springs Road; Walker Boulevard from Mineral Springs Avenue to Powers Street; Montclair Avenue; Underwood Place; White Oak Lane; Valley View Drive from Whittle Springs Road to White Oak Lane; McCampbell Avenue; Upland Avenue; Tecoma Drive; Arbor Place; Maxwell Street; Emoriland Boulevard east of Kuhlman Street; Fairmont Boulevard from Kuhlman Street to Maxwell Street; Avondale Avenue from Whittle Springs to Maxwell Street; Boright Place; Boright Drive from Whittle Springs Road to Maxwell Street; McNutt Street; Brunswick Street; Whitney Place; Forestdale Avenue from Whittle Springs Road to Maxwell Street; Edgewood Avenue from Barton Street to Maxwell Street; Barton Street from Edgewood

to Fairmont; Albert Avenue from Barton Street to Fairview Street; Nickerson Avenue from Barton Street to Bellevue Street; Fairview Street from Nickerson Avenue to Edgewood Avenue; Clearview Street; Orlando Street; Bellevue Street; Derieux Drive; Seymour Avenue; Sandra Avenue; Shaw Drive; Fontana Street; Fairwood Avenue; Powers Street; and Miami Street will be treated Thursday, Oct. 3, weather permitting, between 8:30 p.m. and 2 a.m. A map is attached below. Follow-up spraying is scheduled for Thursday, Oct. 17, weather permitting.

Previously scheduled follow-up sprayings in the Rocky Hill and Milligan Street areas will also take place Thursday, Oct. 3, between 8:30 p.m. and 2 a.m. A complete schedule of treatments is available online at knoxcounty.org/health.

To reduce the risk of mosquito-borne disease, KCHD conducts a West Nile virus control program during summer and fall months. As the weather warms each spring, public health professionals begin a weekly process of trapping and testing mosquitoes for WNV, a mosquito-borne disease which can infect humans, horses and birds. From March until the first frost, KCHD also uses larvicides in areas with standing water to prevent mosquito proliferation. These efforts are in addition to KCHD's work to assess and monitor for other mosquito-borne illnesses. More information is available by calling 865-215-5200 or visiting knoxcounty.org/health.

About Knox County Health Department

As the first health department in Tennessee to achieve national voluntary accreditation by the Public Health Accreditation Board, the Knox County Health Department (KCHD) is dedicated to ensuring the conditions in which every resident can be healthy. KCHD investigates disease outbreaks, identifies community health threats, conducts extensive outreach and education, prepares for public health emergencies, provides and connects the public with medical care, enforces food safety and air quality laws, and more. For more information, visit knoxcounty.org/health.
