SCHOOL-BASED DENTAL PREVENTION PROGRAM

MATERIALS NEEDED

For us to organize and implement the dental sealants program at your school, we need you to provide the following items:

• A floor plan of the school

• Lunch/special area schedules

• List of teacher names and corresponding room numbers

• A designated area for us to set up a portable dental chair and equipment with access to electricity and water. This space should be clean, with adequate lighting. (There is a potential for three hygienists to be assigned to your school.)

• School calendar or list of assemblies, field trips, picture day, grade level testing, etc. that might be taking place during our time on your campus. This will help to maximize our productivity and minimize our stay.

• Protocol for school lock down, medical emergencies and fire evaluation plan. We are required to ask this information per the Tennessee Department of Health.
