

THE SAVER'S TAX CREDIT -- CAN YOU BENEFIT?

It's not always easy to keep contributing to your employer-provided retirement plan. Bills and unexpected expenses can eat up most of your salary, leaving little for retirement savings. You might be tempted to forget about it until you start earning more money.

But before you stop or cut back (or never start) contributing to your plan, understand that you could be entitled to a federal tax credit called the Retirement Savings Contributions Credit, or Saver's Credit, if you meet certain income requirements. In effect, the credit repays a percentage of the contributions you make to your 401(k) or other retirement savings plan by reducing your income tax liability for the year. It may be just the thing that enables you to keep participating in your retirement plan or increase your contributions..

What It Is

The credit is a percentage -- 50%, 20%, or 10% -- of up to \$2,000 in qualified retirement savings contributions for a maximum credit of \$1,000 (or twice that amount for a married couple filing jointly who each contribute \$2,000). The percentage depends on adjusted gross income (AGI) and filing status. The credit is available for contributions to a 401(k), 403(b), governmental 457(b), SIMPLE IRA, or salary reduction SEP, as well as for traditional and Roth IRA contributions.

To claim the credit, you must be at least age 18, not claimed as a dependent on another person's return, and not a full-time student. You will not be able to claim the credit if your AGI exceeds the top of the range for the 10% credit.
